Aspire Mobile Shower Commodes – Range Updates!

In line with our goal of continuous product improvement, we are delighted to share some design changes that have been applied to many of the Stainless-Steel Aspire Mobile Shower Commodes.

Product Improvements

1. **Improved Over Toilet Clearance**

The integrated front hygiene trough now has a higher clearance height of 465mm (previously 415mm). This will suit a wider range of toilets in the market which have changed shape and height with modern designs.

2. **Customisable Seat Height**

The seat height of Swing Away Footrest Commodes can now be easily customised by up to 100mm, achieving an ultra-low anterior/posterior seat height of down to 490/460mm (previously set at 590/560mm). The vertical frame shaft above each castor has been redesigned to facilitate cutting to the desired height. Castors are then re-attached to suit.

3. **Integrated Backrest Angle**

8° of recline has been added to the backrest angle to improve patient comfort, previously 90°and now 98°.

4. **Angle Adjustable Backrest Recline**

Some commodes now have a further 10° of backrest recline available via an adjustable backrest from 98° to 108° of recline.

1. Improved Over Toilet Clearance	2. Customisable Seat Height	4. Angle Adjustable Backrest

5. **Open Back Straps**

All Stainless Steel commodes now utilise multiple horizontal back straps instead of the single wide strap – this improves bathing access.

New Accessories

Lateral / Thoracic Supports

We now have universal lateral or thoracic supports that can be used on all commodes with horizontal backrest strapping. Each support pad has a bracket that is affixed to any of the backrest straps at the desired height, width or position.

Lateral Supports – WCA867010
