### **NEW PRODUCT! Aspire Single Use Patient Slings**

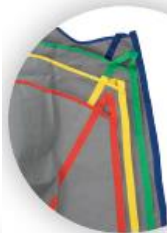

Something that you can throw out, that serves a purpose! Aspire Single Use Patient Slings now in stock!

It is no myth that in Aged Care Facilities and Hospitals, cross contamination risk can become a major issue if not handled properly. Aspire Single Use Patient Slings remove the burden, ensuring an exclusive sling for each resident or patient in the event of an outbreak.

Key features:

- General Purpose Sling with Head Support designed for single and exclusive patient use before disposal when soiled
- Reduces or eliminates the risk of cross contamination between users
- Ideal source of control for facilities and hospitals alike to prevent cross contamination between users
- Strong and durable non-woven fabric provides a comfortable and safe lift
- Identification tag for care and nursing staff to write patients name to help control exclusive use
- Intuitive usage indicator identifies when sling has been wet or washed, rendering it no longer available for use
- Clear coloured binding tape identifies sling size
- Sold in packs of 5

**LSS391100 – Small / LSS391110 – Medium / LSS391120 - Large / LSS391130 – Extra Large**

Clear coloured binding tape identifies sling size.

Intuitive usage indicator identifies when sling has been wet or washed, rendering it no longer available for use.
