Aidacare & DES

Aidacare, in conjunction with our supply partners Pride, Permobil, Sunrise Medical, OttoBock and Invacare are proud to be recognized suppliers of a large number of products listed on the current DES (Domiciliary Equipment Service) contract that provides equipment and home modification services assisting people to be independent at home and in the community.

Each product has a specific order form which must be completed and submitted with the application. Along with a prescription detailing each person's particular needs.

In addition to the items in this catalogue, Aidacare is also able to supply other subsidised equipment including:

- Special purpose wheelchairs
- Pressure cushions and specialised seating components
- Mobile and static commodes
- Pressure care mattresses
- Other bedroom, bathroom and Daily Living equipment.

Our electronic catalogue is available for download at www.aidacare.com.au

For the full range of our equipment please browse the complete online Aidacare Catalogue at www.aidacare.com.au.

For additional information please contact our friendly staff on: 1300 133 120, specialised equipment professionals

OUR SERVICES

Aidacare offer a broad range of services to DES prescribers and clients including:

- Access to an extensive range of demonstration stock for trial
- Specialist sales staff to assist with trials and support prescription of customised and specialised equipment
- Clinical specialists to provide additional advice and support for healthcare
- Clinical education and support
- Service & repair field technicians
- General customer service and support including the booking of equipment trials

OUR CASE CONSULTING SPECIALISTS

Helen Smith

Helen is an Occupational Therapist with many years of experience in the field of Mobility and Seating. She is passionate about achieving accurate seating and positioning outcomes for clients and has been involved in the prescription of both powered and manual mobility and complex seating here and abroad. In her role at Aidacare, Helen will be working with both adult and children in wheelchair and seating prescriptions and specialised equipment solutions.

Michael Mifsud

Michael is an experienced seating and wheelchair technician who specialises in Complex Rehab equipment. Michael is skilled in the fabrication of customised seating (foam on ply) and the setup of complex seating systems whether it be modular or customised.

He has been involved in power mobility programming and electronics and the repair and diagnostics of power mobility electronics.

Linh Yeomans

Linh is a Physiotherapist with many years of experience in the prescription of manual and powered mobility and customised complex and modular seating systems for both adults and children. Linh has also been involved in the prescription of paediatric mobility and positioning and general specialised paediatric equipment such as standing frames, strollers, walkers and sleep systems. Linh manages the Complex Rehab department at Aidacare SA, however, also carries out wheelchair and seating assessments for both adults and children.

DES Order & Approval Process

Aidacare offers a service to Prescriber's that are based on "Partnering to provide the best solution". We listen, respond and work with therapists to provide the highest possible customer service solution for the client.

DES Catalogue

- Referral is received by Prescriber
- Prescriber carries out an assessment to identify client's needs and DES funding eligibility
- Together the client and prescriber consider possible equipment solutions or modifications required

www.aidacare.com.au

If client is approved for DES funding, the prescriber contacts DES for product/equipment availability. If no suitable product match is found, the prescriber contacts Aidacare to arrange an in home trial or the client is seen in the Aidacare seating clinic. Trials are only started once funding has been approved

Aidacare Admin:

P 1300 133 120
F 1300 787 052
E des@aidacare.com.au

SOLUTION

Once possible equipment choices have been trialled, the client along with the prescriber and the Aidacare Complex Rehab Specialist will decide what equipment will work best to meet the client needs

ORDER STEP 1

Aidacare provides the prescriber with detailed product information and a formal quote

ORDER STEP 2

Prescriber forwards to DES:

- Aidacare quote
- Product specifications
- Appropriate prescriber application forms

DES APPROVAL GRANTED

DELIVERY

When all equipment is ready for delivery, an Aidacare Complex Rehab team member will contact the prescriber. Depending on what equipment or modifications are supplied, these will need to either go to the DES warehouse for 'barcoding' or the work (such as wheelchair and seating modifications) may be carried out or supplied directly to the client in consultation with the prescriber as required.

CUSTOMISED AND SPECIALISED EQUIPMENT

CUSTOMISED SEATING & MOBILITY SOLUTIONS

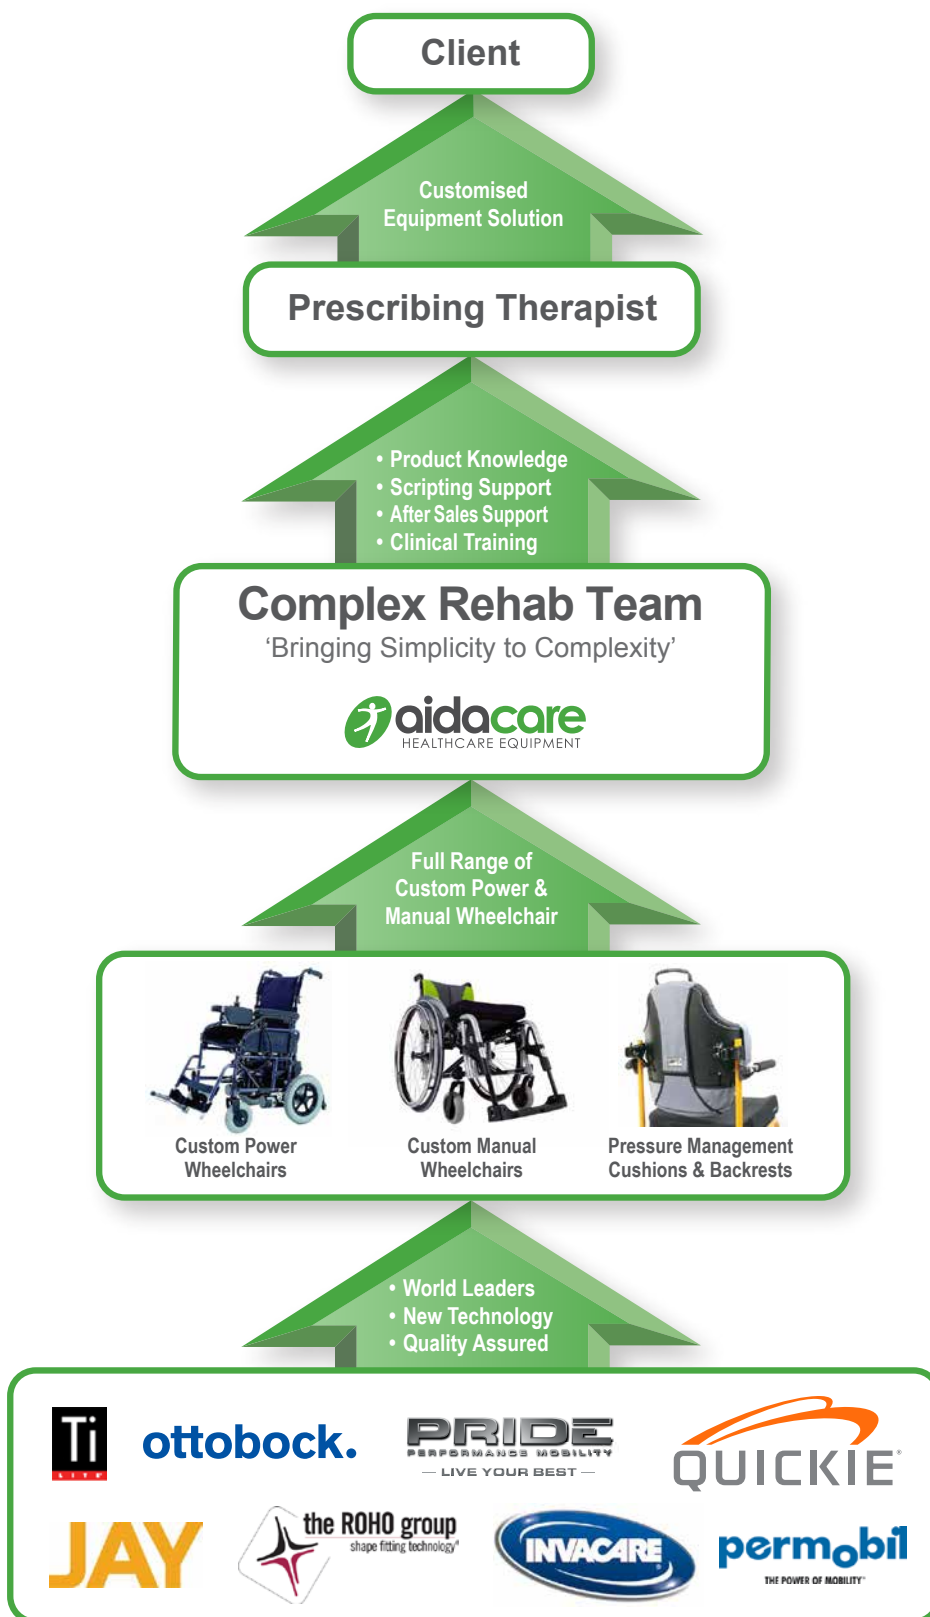

Aidacare Complex Rehab Specialists are dedicated to provide specialised advice, service and equipment based solutions for our clients.

This specialised field is supported by our experienced team of specialists, Customer Care and Technical service staff with practical hands on experience and professional training including qualified Therapists and Rehab Engineers.

The key focus areas of our Complex Rehab team includes:

- Scripted Manual Wheelchairs
- Scripted Power Wheelchairs
- Seating & Positioning Products
- Pressure Management Cushions

The Aidacare Complex Rehab Specialists in conjunction with therapists assess and recommend the clinically appropriate product solution based on the individual client needs. We are not limited to a specific range or style, enabling us to recommend the right option. Aidacare represents the full scope of leading international industry brands and models.

Description	Seat Width	Seat Depth	Back Height	Floor to Seat Height	Warranty	Product Weight	Max. User Weight
Solara 3G	300 - 610 mm	300 - 560 mm	430 - 610mm	317-483mm	24 months	8 kg	136 kg

FREEDOM NXT

The NXT is the most rigid, folding, paediatric tilt-in-space manual wheelchair on the market. Its strong and durable, yet compact and lightweight. The NXT ensure both the child and carer remain comfortable by providing a smoother ride and a user friendly solution. When the growth spurt hits and the frame won't fit, the NXT adjusts easily for a good fit today and tomorrow.

Description	Seat Width	Seat Depth	Warranty	Max. User Weight
Freedom NXT	254 - 508 mm	305 - 406 mm	24 months	102 kg

POWERED WHEELCHAIRS / SCOOTERS

Power wheelchairs are customisable and have more options for seating. For users who require positioning devices for trunk control and stability, a power wheelchair can be customized with seat and back cushions with many positioning features. Power wheelchairs also have options for electric tilt and recline, which are features that can be beneficial for people who have limited ability to reposition themselves in the wheelchair. Tilt and recline features provide comfort and pressure relief from sitting for long periods of time.

A main difference between a power wheelchair and electric scooter is the turning radius. Power wheelchairs typically have a smaller turning radius, which means that they are more maneuverable in small spaces. Power wheelchairs also have more options with center wheel drives or front wheel drives for a small turning radius in tight spaces.

Both electric wheelchairs and electric scooters allow a person to travel for long distances. This is an important benefit for people with limited mobility as it provides opportunity to go farther in their community than they might in a manual wheelchair.

Power wheelchairs also offer the benefit of traveling over a variety of terrain through the options of tire types and wheel positions. The most popular position for wheels in power wheelchairs are rear wheel drive, where the large wheel is in the back and the smaller casters are in front, which provides stability in driving both indoor and outdoor. Alternatively, center wheel drives or front wheel drives, where the large wheels are placed in the center or the front of the power wheelchair change the center of gravity for the wheelchair and can help in maneuvering over obstacles and curbs.

A200

The A200 is a compact rear wheel drive chair designed for all-round basic indoor and outdoor performance. A200 is easy to disassemble and fits into most cars for transportation. The standard seat frame is compatible with most modular seating options and is adjustable in width, depth and back angle. As an alternative to the standard seat, you may prefer to choose the optional Contour Seat.

- Adjustable seat frame in widths 38-48cm, depths 38-50cm
- Tension adjustable backrest upholstery and standard seat cushion
- Height adjustable armrests
- Swing away removable legrests
- Basic seating package

Description	Seat Width	Seat Depth	Range	Max Speed	Turning Radius	Product Weight	Max. User Weight
A200	380-480 mm	360-500 mm	22 km	6km/h	700 mm	66 kg	100 kg

TDX SP

The TDX SP (Total Driving eXperience) takes all the best features of the TDX series and improves upon them with enhanced performance, superior ride quality, quieter chassis and elegantly simple designs. With built-in technologies such as True Centre Wheel drive, Enhanced SureStep, Traction Control Design, Quiet Stability Lock, MK6i Electronics and powerful 4 pole motors, the TDX SP is designed to meet the needs of rehab clients who demand performance and style

- Traction control design
- Faster & more powerful
- Quiet stability lock
- Elegant simplicity
- Seating options

Description	Seat Width	Seat Depth	Turning Radius	Max Speed	Max. User Weight
TDX SP	300 - 600 mm	300 - 550 mm	560 mm	9.6 km/h	136 kg

Q6 EDGE

The latest powered in the Quantum range, the q6 Edge supersedes the Q600 offering superior drive and functionality similar to the Q6000 but at more economical price. Fully compatible with the Tru-balance seating system and equipped with ATX suspension the Q6 Edge offers comprehensive seating options with high levels of stability.

- Exceptional performance and value
- Standard 4-pole motors
- Low seat-to-floor heights
- Full rehab capability
- Adult model pictured

Description	Seat Width	Seat Depth	Floor to Seat Height	Max Speed	Warranty	Max. User Weight
Q6 Edge - Adult	250 -560 mm	250-560 mm	400-450 mm	10km/h	24 months	136 kg
Q6 Edge - Paediatric	250-560 mm	250-560 mm	440-490 mm	9.7km/h	24 months	136 kg

TORQUE SP

The Invacare® Storm Series® Torque™ SP power wheelchair with 4-pole motors and MK Series™ power wheelchair electronics offers many of the features and options found on the other Storm Series models while maintaining a truly affordable price. Built on the rugged Storm Series H-frame design, the Torque SP power wheelchair offers a proven, durable construction and rubber element independent rear suspension for a softer ride. Rehab has equipped the unit with powerful new GLIDE Motors for added power and torque.

- MKIV™ RII non-expandable power wheelchair electronics standard
- TT® TrueTrack technology (optional) keeps the power wheelchair on a true forward path and reduces driver fatigue
- 4-pole motors provide true gear reduction and higher torque for many rehab needs
- Rubber element rear wheel suspension absorbs significant jolts and impacts. Upgrade to Monroe® independent rear suspension and/or shock forks for additional vibration dampening

Description	Seat Width	Seat Depth	Floor to Seat Height	Max Speed	Warranty	Max. User Weight
Torque SP	300 - 550 mm	300 - 550 mm	420-530 mm	9km/h	24 months	136 kg

R44 LIGHTNING

The new R44 rear-wheel drive power chair features a high-forward pivot long trail arm, a state-of-the-art design that provides dramatically improved obstacle climbing performance and a smoother ride. The R44 also has outstanding tight space manoeuvrability, a sliding battery tray for easy access and accepts rehab seating and electronics. With its stylish, sleek design and a standard speed of up to 9.65 km/h (6 mph), the R44 is a superior power chair for even the most active clients.

- Narrow 64.1 cm (25") width and compact 88 cm length
- Outstanding tight space manoeuvrability
- Maximum speed up to 9.65 km/h (6 mph)
- High-performance, high-efficiency motor package
- Accepts rehab seating
- Swing-away joystick
- Accommodates full range of Pride® seating and accessories
- Sliding battery tray for easy access
- Available in paediatric sizes

Description	Seat Width	Seat Depth	Max Speed	Warranty	Max. User Weight
R44 Lightning	460 mm	410 mm	6.5 km/h	24 months	136 kg

TDX SP CG (TILT) & MCG TILT & RECLINE

The TDX SP is the first model in the next generation of TDX (Total Driving eXperience) power wheelchairs. The TDX SP takes all the best features of the TDX series and improves upon them with enhanced performance, superior ride quality, quieter chassis, and an elegantly simple design.

- The available Invacare FormulaCG Powered Seating which features up to 7" of weight shift tilt
- Rehab (ASBA) seat that adapts for growth in both width and depth
- Semi-recline captain™ seat is available in 16", 18", 20" and 22" widths
- Optional heavy-duty package

Description	Seat Width	Seat Depth	Turning Radius	Max Speed	Max. User Weight
TDX SP	300 - 600 mm	300 - 550 mm	56 cm	9 km/h	136 kg

Q6000Z

The Quantum 6000 Rehab Power Wheelchair incorporates aggressive new features, powerful 4-pole Hammer motors, and patented Mid-Wheel 6TM design platform to deliver unmatched performance and tight-space maneuverability while delivering limitless rehab capability.

Description	Seat Width	Seat Depth	Floor to Seat Height	Max Speed	Warranty	Max. User Weight
Q6000Z	250-610 mm	250-610 mm	460-510 mm	18 km/h	24 months	136 kg

QUICKIE XPLORE

Quickie Xplore is an excellent choice for an active user spending time outdoors. The directional stability at high speeds in all types of environments, helps ensure that the end user's optimal Center of Gravity will be maintained without any adjustments required.

Description	Seat Width	Seat Depth	Floor to Seat Height	Max Speed	Warranty	Max. User Weight
Quickie Xplore	250-610 mm	250-560 mm	400 mm	9.7 km/h	24 months	181 kg

Low Profile

ROHO SINGLE VALVE HIGH PROFILE/ LOW PROFILE CUSHION

- The Roho High Profile Wheelchair Cushion features 4" (10 cm) interconnected air cells to provide an adjustable, low deformation, counter-pressure environment that assist in the healing of ischemic ulcers. Appropriate for the high risk client.
- The LOW PROFILE ROHO cushion is an adjustable skin protection and positioning wheelchair cushion that has 2" (5cm) high cells to provide excellent protection against skin breakdown. Also available with dual valves for side-to-side or front-to-back positioning and support.
- The LOW PROFILE Cushion is recommended for clients who are at moderate risk to high risk -or skin breakdown, have no or partial sensation, are able to do independent weight shifts, and can propel their wheelchair with their feet.

Please consult with Aidacare's Complex Rehab Specialists for this item.

All models include

- Cushion Cover
- Pump and patch kit
- Operating Instructions
- 36 Month Warranty

High Profile Dual Valve

Low Profile Dual Valve With Cover

ROHO® - DUAL VALVE HIGH PROFILE/ LOW PROFILE

- Two separate compartments of the cushion allow positioning adjustments to address a pelvic obliquity (side-to-side) or sacral sitting (front to back).
- The Dual Compartment offers slightly less postural control and flexibility than the Quadtro Select range but retains the pressure and shear risk management standard for ROHOs
- The High Profile Cushion features 4" (10 cm) interconnected air cells for higher pressure disbursement
- The Low Profile Cushion features 2" (5cm) high cells for greater stability
- Appropriate for clients with high risk of ischemic ulcers

ROHO® - HYBRID ELITE CUSHION

- Two trusted brands, one effective solution. The Hybrid Elite combines the skin protection and shape matching ability of ROHO Dry Floatation with a contoured foam base designed for ROHO by JAY
- The design allows for improved pelvic alignment and stability while maintaining optimal immersion and dispersion of pressure away from the pelvic area
- The stability provided by the JAY foam base also assists with achieving safer transfers
- The ROHO Dry Floatation system and 2-way stretch cover help reduce friction shear whilst maximising blood flow
- Appropriate for clients with moderate to high risk of skin breakdown who require positioning support

Hybrid Elite Cushion Assembly

All models include

- 2-way stretch cover
- Hand Pump & Repair Kit

- 1 Closed-cell ultra-lightweight base
- 2 'Jay Flow' fluid Tripad
- 3 JAY AirExchange or Incontinence cover (optional)

JAY - J2 CUSHION

- Designed for the client who has moderate to more aggressive postural needs that may change over time
- The J2 pre-contoured, closed-cell, lightweight, foam base provides excellent lateral and forward/rearward stability creating a foundation for postural stability
- Designed for the client with moderate to aggressive postural needs that may change over time
- The J2 pre-contoured, closed-cell, lightweight, foam base provides excellent lateral and forward/rearward stability creating a foundation for postural stability
- The base fluid pad can be modified/customised on site to accommodate fixed postures or to correct flexible postures. Modifications can support changing needs over time
- Optional solid seat inserts provide extra postural stability discouraging the cushion from slinging with the chair upholstery
- Postural accessories such as medial and lateral thigh supports, lateral pelvic supports and pelvic obliquity supports can be added to the cushion
- The 'Jay Flow' fluid Tripad conforms to bony prominences, distributes pressure more evenly and reduces peak pressures. The Tripad design assists in maintaining fluid under the at-risk bony areas
- Most suitable for the client who is at higher risk of skin breakdown and who has poor skin integrity
- Optional Balistic Stretch; AirExchange or Incontinence cover.
- 24mths Warranty (6mths on cover)
