HUNTINGTON'S BED - ELECTRIC

 Huntington's Bed is registered in the ARTG, AUST R ARTG 300047

BEB046010

Made in Germany, the Careline Huntingtons bed is of the highest quality. The beds are sturdy in construction and built to resist constant movements by the user. The mattress is also waterproof and designed to reduce the risk of shearing.

The bed offers high low functions, backrest and leg support in addition to being fully padded for the protection of the user. This padding extends to the head and footboards and also the rails are padded.

The padded rails are electrically operated to minimize risk to users and also carers. The castors are lockable by a foot control.

Suitable For:

- Huntington's Disease
- Cerebral Palsy
- Multiple Sclerosis
- Restless Legs
- People needing padded protection from thrashing

FEATURES:

Rounded edges

Padded sides are electrically powered

Robust, Waterproof Vinyl Covers

Robust - German made

Fully padded at head, feet and sides

No gaps to ensure limbs do not get caught

Hi-Lo electrically adjustable bed

Suitable for Community and Nursing Homes

BED WIDTH

900 - 1100mm

BACKREST INCLINE/DECLINE

0 - 77°

KNEE BEND INCLINE/DECLINE

0 - 35°

MATTRESS DIMENSIONS

2000 x 900 mm

SAFE WORKING LOAD

250KG

ATLANTA CHAIR

CHP197820

A robust and durable chair which provides a safe and comfortable seat for those with vigorous involuntary movements while reducing the risk of falling from the chair.

The Atlanta™ is necessary to comfortably accommodate individuals who may be challenging to seat. It is a unique in that it provides security without compromising function, pressure or postural management.

The integrated tilt and recline mechanism is fundamental in positioning and will reduce the risk of sliding, pressure damage and hazardous postural tendencies like posterior pelvic tilt. The resultant deep seat and high arms is beneficial for those who may be at risk of falling from the chair.

The Atlanta™ is successfully used in the management of lower limb oedema. The variable angle leg rest used in combination with the integrated tilt and recline helps to elevate the feet higher than the heart which is the optimum position for fluid drainage. Individuals with tight hamstrings and contracted legs can also be accommodated due to the negative angle clearance underneath the seat which allows the feet to retract behind the knee without compromising the persons position in the chair.

The Atlanta™ is effective for adults with the following disabilities and conditions:

- Huntington's disease
- Alzheimer's disease
- Lower limb oedema
- Cellulitis
- Advanced dementia
- Parkinson's disease
- Brain Injury

The Atlanta™ has been proven effective for seating clients with the following postural and medical conditions:

- Lower limb oedema and swelling
- Contracted legs
- Risk of pressure ulcers
- Vigorous involuntary movement
- Agitation
- Risk of falling or sliding from chairs
